TECHKRITI'23

INDIAN INSTITUTE OF TECHNOLOGY, KANPUR

ASIA'S LARGEST TECHNICAL AND ENTREPRENEURIAL FESTIVAL

ODYSSEY OF TECHKRITI

Indian Institute of Technology, Kanpur, celebrated internationally as the center of academic excellence and knowledge exchange, announces the 29th edition of Asia's Largest Technical and Entrepreneurial fest, Techkriti'23.

Over the years, Techkriti has inculcated the exponent of exuberance and creativity within every passionate student to develop their technological quotient. It fostered the ray to fortify young entrepreneurs, a substantial indicator for nation-building. Recognized as the precursor of innovative thoughts, the festival has established its position as one of the largest technical festivals in Asia. Techkriti has gained worldwide status as a technical and entrepreneurial symposium for developing cutting-edge technologies and implementations.

The vision of Techkriti'23 is to come up with exemplary innovations and technology that will be instrumental to the central issue pertaining to society, the environment and the present education system. Techkriti also heralds the ideas of "practicality and feasibility"- an essence of innovation and a vibrant community. Techkriti 2022 has worked on every aspect, from inspiring to entertaining students with fascinating talks of Nobel laureates, exhibitions on the latest technology, and competitions that explore one's wisdom and get gut-busting frolic.

Techkriti'23, while reminiscing the feat achieved over the years, brings forward an exemplary matrix forged through years of dedication, efforts and innovation. After exposing a plethora of possibilities in the field of science and technology, the time has aligned itself to leap into a fascinating realm where innovation, technology and creative ideas can flourish. So saddle up and prepare your breakthrough spark rolling for a voyage aimed at successfully implementing our vision and brilliance at IIT Kanpur.

"Just as energy is the basis of life itself and ideas the source of innovation, so is innovation the vital spark of all human change, improvement and progress."

WHO WE ARE

Indian Institute of Technology, Kanpur is one of the world's premier science and engineering schools and undoubtedly the most dignified educational institution in India. Techkriti is the annual Technical and Entrepreneurial festival of IIT Kanpur, which has its roots laid in almost all parts of the country and even internationally. Lately, Techkriti has become one of Asia's most prominent and zestful student festivals.

<<< SOCIAL CAMPAIGNS

INITIATIVES

BLOOD DONATION

Started for a noble cause, Raktarpan provides a support to solve the problem of blood shortage in the country by uniting youth, organizing camps and running a helpline number.

CYCLOTHON

Cyclothon in the Techkriti family is mainly aimed towards creating awareness about exercise and healthy lifestyle.

HEALTH CAMPS

Health camps aims at building awareness regarding common ailments, nutrition, hygiene and sanitation. These camps provide comprehensive health services free of cost.

MAKE A WISH

A campaign in which we asked each child of an orphanage to 'Make A wish' and gave our best to fulfill those wishes via donations from the benevolent public.

BLISS

(Brightening Lives by Igniting Social Support)

Our society has a visible dissimilitude between the privileged and underprivileged segments. Techkriti strongly believes that a meaningful and pertinent effort in the direction can bring a radical positive change in society. This year too, we continue the tradition of our social initiative- B.L.I.S.S. (Brightening Lives by Igniting Social Support), intending to enlighten and touch the lives of overlooked brackets of society by providing support and care with the belief of spreading smiles.

BLISS started its journey with old age home visits, where we interacted with our senior citizens to make them realize that they are still needed and still there is someone to care for them.

Under the umbrella of BLISS, we also organized a 'Run for a cause' marathon in the wake of recent floods in Kanpur villages. We aimed to reward athletic talent and promote building sports facilities.

HOPE

(Handing Opportunities by Promoting Education)

Techkriti has always been working towards the betterment of society. We have recently launched our social initiative, HOPE (Handing Opportunities by Promoting Education), intending to promote education for all, especially the underprivileged section of society. It primarily aims to promote technical and non-technical education with the opportunities to explore the world.

HOPE started its journey with a theme-based poster-making competition organized for school students in collaboration with Prayas, an IIT Kanpur organization working towards providing education to marginalized kids in and around our campus.

HOPE will continue to nurture the lives of the underprivileged by working on the following events.

Poster Making Competition

Establishing Computer labs in Schools

Sponsoring Education for Financially Backward Children

Demonstrating Science Experiments

INDUSTRY 4.0 SUMMIT

Introduction

An era concludes, and the following groundbreaking epoch surfaces, thus bringing the fourth industrial revolution into the vantage, Industry 4.0. Industry 4.0 encompasses four significant components, namely, cyber-physical systems, the Internet of things, cloud computing and cognitive computing, forming smart factories. Within these modular structured smart factories, cyber-physical systems monitor physical processes, create a virtual copy of the physical world, and make decentralized decisions. Over the Internet of things, the designed cyber-physical systems interact with each other and humans in real-time internally and across organizational services, forming an integral component of the value chain. The next fascination revolves around Artificial Intelligence, the key driving factor behind the Industry 4.0 revolution to spearhead and advance into the future. Techkriti envisions this revolution and brings you the unprecedented technical summit with the theme: Industry 4.0. It will be the most exciting.

ENTREPRENEURIAL CONCLAVE

Conducted as a part of the main fest to ignite the spark of entrepreneurship among the youth, which play a pivotal role in shaping the nation's economy.

E-Conclave houses the Talks, Panel Discussions, Workshops, and Competitions revolving around the business and entrepreneurial world.

While *Startup Expos* could be found happening simultaneously around the corner, the Competitions, including *Upstart Pioneer*, *Pitch Premier* and *Stockism*, could be found testing the business acumen of the next generation of Entrepreneurs.

TECHKRITI OPEN SCHOOL CHAMPIONSHIP

Techkriti Open School Championship is an annual school aptitude examination for classes 6th to 12th, conducted and organized by Techkriti, IIT Kanpur. Our mission is to strengthen and cultivate our nation's talent at the grassroots level. Through a series of events involving mental aptitude, logic and scrutiny, it seeks to provide school students a platform to build real experience and knowledge, exercise coordination skills, and think out of the box.

TECHNOCRUISE

Technocruise is the pre-festival Zonal event of Techkriti which comprises prelims rounds of major competitions and professional technical workshops on cutting-edge technologies. Technocruise spanned over 30 major cities in India in previous years. In the past editions, we witnessed the participation of over 8,000 in workshops and events from nearly 250 colleges from all over India. This year we are expecting a pulsating boom in this number.

CAMPUS AMBASSADOR

The CA programme offers a golden opportunity for students from different colleges to be a part of Asia's Largest Technical and Entrepreneurial festival. Every year, Techkriti appoints more than 500+ campus ambassadors from various colleges across the nation as part of the CA program.

These ambassadors' primary duty includes promoting Techkriti inside and outside their college while entitling them to hone their management and organizational skills. It aids in fostering the network edifice with other people as well.

Chance Of A Lifetime For The Young Curious Minds To Witness ISRO With TOSC, IIT Kanpur

Kanpur (The Hawk): IIT Kanpur stands tall among the list of premier institutions of the world and has always been a place to drive and support the winds of innovation. It always puts forward one platform or the other for students to showcase their talents. This is evident from all the outstanding achievements in the field of technology. To bring this spirit of innovation to our budding community, i.e., the school students of India, IIT Kanpur, on the 28th edition of its annual technical and entrepreneurial extravaganza, Techkriti '22, brings to you a new and revamped version of Techkriti Open School Championship (TOSC). Contrary to other competitive examinations, instead of just marks and academic aptitude, TOSC focuses on innovation and pragmatism while dealing with real-life problems. It aims at strengthening mental aptitude, logic and scrutiny, providing a platform to build fundamental experience and knowledge, and exercising coordination skills while providing solutions never thought of before. The registration fee per student is Rs. 195/- The

Techkriti'22: IIT Kanpur's annual fest explores new horizons in tech, biz eco-system

The Indian Institute of Technology, Kanpur (IIT-K), hosted the 28th edition of its annual festival 'Techkriti' 22, which is also Asia's largest technical and entrepreneurship festival, from March 25 to 27 in hybrid (both offline and online) mode.

LOCK-IN: The Indian Institute of Technology, Kanpur (IIT-K), hosted the 28th edition of its annual festival 'Techkriti' 22, which is also Asia's largest technical and entrepreneurship festival, from March 25 to 27 in hybrid (both offline and online) mode.

The prominent participants in this year's event included Nobel laureate Muhammad Yunus and many other dignitaries from various fields. With the theme "Transcending Origins", the prestigious institute offered a platform for experts to present, discuss and explore various crucial aspects of business development, start-ups and entrepreneurial ecosystem and environment.

There were various talks scheduled for the three-day event where experts from various sectors exchanged ideas and plans for the future. One such talk was "Road to Techkriti", Bangalore Nobel laureate Muhammad Yunus, who was awarded the Nobel Prize for Peace in 2006 for his work in microcredit and microfinance, talked about his own idea of creating a "World of Three Zeros".

The two most talked-about areas are zero-carbon emission,

zero wealth concentration and zero unemployment.

He also spoke on valuing the nature and world towards preventing global warming. He said the current profit-driven economic system has concentrated the capital in the hands of few, leaving the economic system to be nothing but a ticking time bomb. He also said the economic crisis caused due to the Covid pandemic must be reversed.

IIT Kanpur alumnus Gangan Khanna, CEO, PD Hinduja Hospital, spoke on improving healthcare performance through digital transformation" talked about the history and significance of technology in healthcare and how it can and be uplifted from "sick care" to "healthcare".

The three-day event hosted various workshops, competitions and exhibitions with talks in a dynamic virtual platform.

[TECHKRITI'22]

IIT-K's annual fest explores new horizons in tech, biz eco-system

"Techkriti has been a platform where ideas and experiments take place and research and innovation one step further. The amalgamation of old vs newer the new trend resonated with the theme 'Transcending Origins'. This would not only groom future leaders but would also give shape to countless ideas of young entrepreneurs and innovators," he said.

There were various talks scheduled for the three-day event where experts from various sectors exchanged ideas and plans for the future. One such talk was "Road to Techkriti", Bangalore Nobel laureate Muhammad Yunus, who was awarded the Nobel Prize for Peace in 2006 for his work in microcredit and microfinance, talked about his own idea of creating a "World of Three Zeros".
